Education

PDA College of Engineering (B. E.)   2018-2023

CSE | CGPA – 7.46

Doddappa Appa PU College, Kalaburagi   2017-2018

PUC (Class XII) | Percentage:65

KGP Public School, Kalaburagi   2015-2016

Class X | Percentage:92

Skills

Node | JavaScript | React | Python | MySQL | HTML 5 | CSS 3 | Bootstrap | C | Git

Projects

Student Management System

The project is an example of a managing student data application based on JAVA and ANDROID STUDIO where users can access the particular student record data.

Implementing a Student Management System can significantly enhance the efficiency, transparency, and overall management of educational institutions, contributing to a better learning environment for both students and faculty.

Chat-Bot Using Firebase

The project is an example of web-based chat application where we can chat from one place to different place to connect people online.

Application where users can interact with each other.

By using technology: React Js, React hooks, Redux, Firebase (Cloud).

Covered key concepts for authenticating a user with firebase in a real-time chat application..

Invoice Processing

Developed an invoice processing website which stores the data of user and removes when the pending amount is cleared. The code is very efficient and can debug the code very easily.

Technology used – JavaScript and React.

Certification Courses / Training

Web Development (HTML5, CSS3, Javascript) -> Provider: Be-practical Techsolutions.

Complete Java Development bootcamp - Udemy
